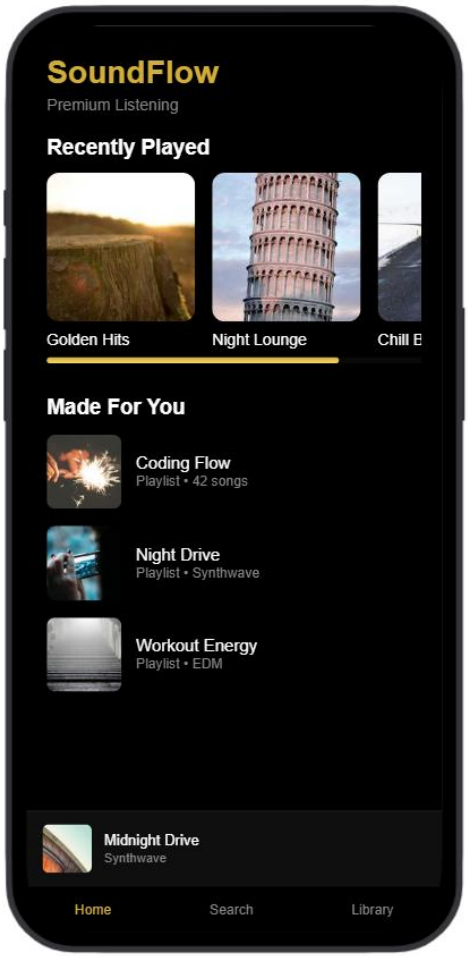
EXPERIMENT 3A

240701326 MOHAMMED HAMZA

AIM

The aim is to develop a prototype incorporating both familiar and novel navigation elements and assess usability among diverse user groups using Proto.io.

SCREEN 1



The Home page is the main dashboard of the SoundFlow music streaming application. It provides users with quick access to recently played music and personalized playlist recommendations.

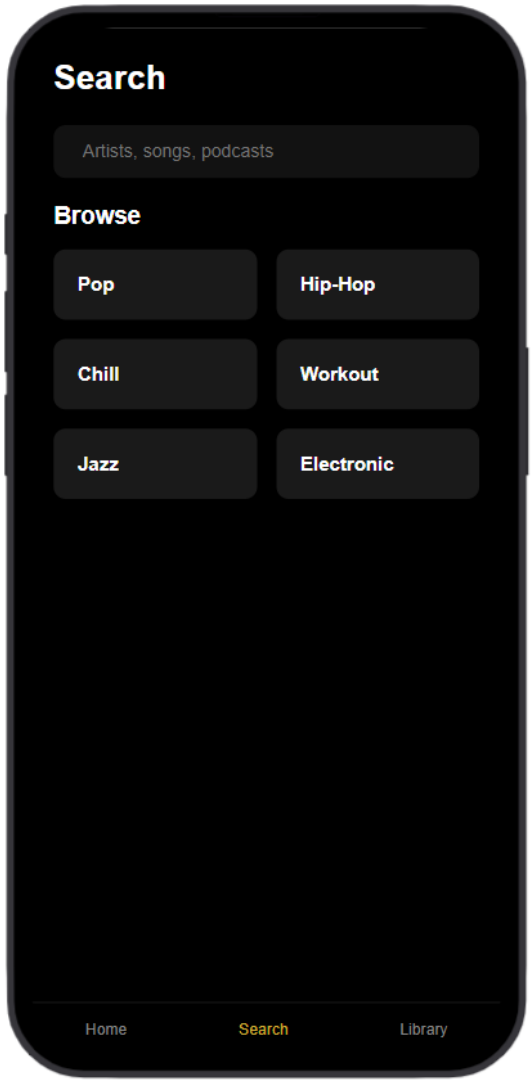
Familiar Navigation Elements

1. Home Icon (Bottom Navigation Bar)
   - A commonly used navigation element in mobile applications.
   - Allows users to return to the main home screen.
2. Search Icon (Bottom Navigation Bar)
   - Used for searching songs, artists, albums, or podcasts.
3. Library Icon (Bottom Navigation Bar)
   - Opens the user's saved playlists and liked songs.
4. Recently Played Section
   - Displays the music that the user recently listened to, allowing quick access.
5. Playlist Cards (Golden Hits, Night Lounge, Chill Beats)
   - Card-style UI elements used to represent music playlists.
6. Made For You Section
   - Shows personalized playlist recommendations such as Coding Flow, Night Drive, and Workout Energy.

Unfamiliar Navigation Element

1. Horizontal Scroll Navigation
    - Users can swipe horizontally to browse playlists in the "Recently Played" section.
    - This gesture-based navigation replaces traditional button-based navigation and allows smoother browsing of music content.

SCREEN 2



The Search page allows users to discover music by searching for artists, songs, albums, and podcasts. It also provides genre-based browsing to help users quickly explore different types of music.

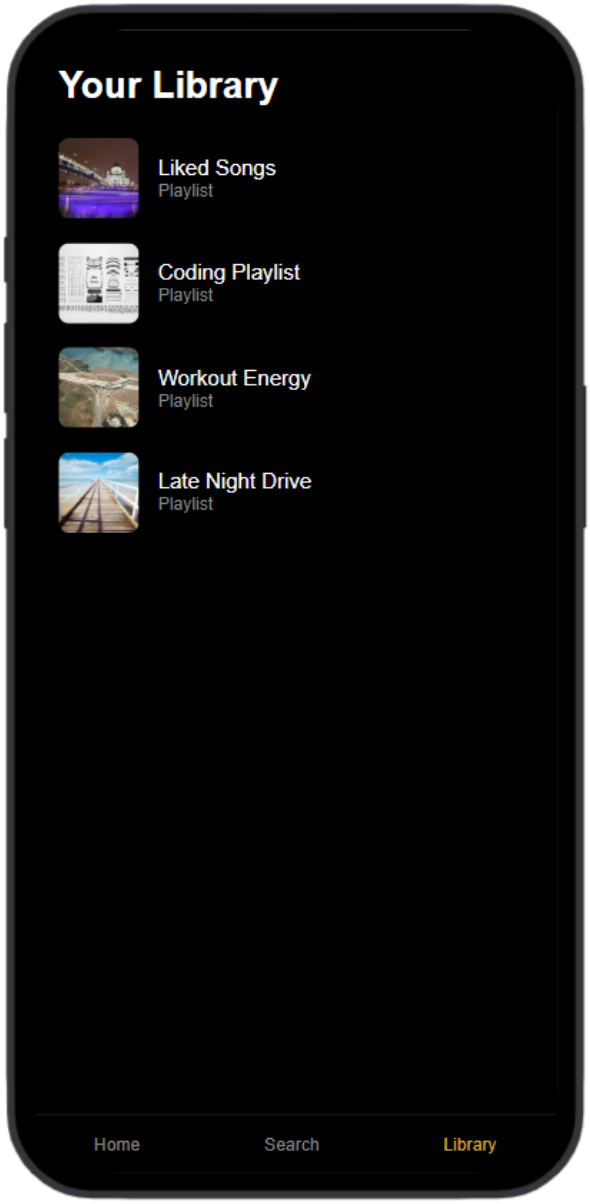
Familiar Navigation Elements

1. Search Bar (Top Section)
    - A commonly used interface element that allows users to type and search for specific artists, songs, or podcasts.
2. Browse Section
    - Displays different music genres such as Pop, Hip-Hop, Chill, Workout, Jazz, and Electronic.
3. Genre Buttons
    - These buttons help users quickly access playlists and songs related to a specific music category.
4. Bottom Navigation Bar
    - Home Icon: Takes the user to the home page.
    - Search Icon: Indicates the current screen.
    - Library Icon: Opens the user's saved playlists.

Unfamiliar Navigation Element

1. Category-Based Music Discovery
    - Instead of browsing through a long list of songs, users can explore music through genre tiles.
    - This grid-style browsing helps users discover music quickly and improves navigation efficiency.

SCREEN 3



The Library page allows users to view and manage their saved playlists and liked songs. It provides quick access to the user's personal music collection in a simple and organized list format.

Familiar Navigation Elements

1. Playlist List View
    - Displays the user's saved playlists in a vertical list format.
    - Examples include Liked Songs, Coding Playlist, Workout Energy, and Late Night Drive.
2. Playlist Thumbnail Images
    - Each playlist contains a small cover image to help users visually identify the playlist.
3. Playlist Titles and Labels
    - The name of each playlist is clearly displayed along with a label indicating it is a playlist.
4. Bottom Navigation Bar
    - Home Icon: Returns the user to the home page.
    - Search Icon: Opens the search interface.
    - Library Icon: Indicates the current screen and gives access to the user's music library.

Unfamiliar Navigation Element

1. Direct Playlist Access
    - Users can instantly open playlists directly from the library list without navigating through multiple menus.
    - This improves efficiency and simplifies navigation.
