EXPERIMENT : 4B

Task Analysis for an app using Dia

ROLL NO.:240701326

NAME:I MOHAMMED HAMZA

Conduct task analysis for an app (e.g., online shopping) and document user flows. Create corresponding wireframes using dia.

Aim:

The aim is to perform task analysis for an app, such as online shopping, document user flows, and create corresponding wireframes using Dia.

Tool Used:

http://dia-installer.de

Procedure:

1. Install Dia:

○ Download Dia from the official website (http://dia-installer.de/)

○ Install Dia on your computer

○ Open Dia:

○ Launch the Dia application.

2. Create New Diagram:

○ Go to File -> New Diagram.

○ Select Flowchart as the diagram type.

3. Add Shapes:

○ Use the shape tools (rectangles, ellipses, etc.) to create wireframes for each

screen.

■ For example:

■ Home Page: Rectangle

■ Product Categories: Rectangle

■ Product Listings: Rectangle

4. Connect Shapes:

■ Product Details: Rectangle

■ Cart: Rectangle

■ Checkout: Rectangle

■ Order Confirmation: Rectangle

■ Order History: Rectangle

○ Use the line tool to connect shapes, representing the user flows.

■ For example:

■ Home Page -> Product Categories

■ Product Categories -> Product Listings

■ Product Listings -> Product Details

■ Product Details -> Cart

■ Cart -> Checkout

■ Checkout -> Order Confirmation

■ Order Confirmation -> Order History

5. Label Shapes:

○ Double-click on each shape to add labels.

■ For example:

■ Label the rectangle as "Home Page", "Categories", "Product Listings", "Product Details", "Cart", "Checkout", "Order Confirmation", "Order History".

6. Save the Diagram:

○ Go to File -> Save As.

○ Save the diagram with a meaningful name, such as "Online Shopping App User Flows".

Conclusion:

The experiment demonstrates how Dia can be used to design a clear and structured flowchart for a train ticket booking system. The step-by-step representation improves understanding of the booking process. The login decision ensures user authentication before payment, and the overall flow enhances usability and user experience.
