EXPERIMENT 8B

Create storyboards to represent the user flow for a mobile app using OpenBoard.

AIM:

To design and represent the user flow of a food delivery mobile application using storyboard sketches created in OpenBoard.

TOOLS REQUIRED:

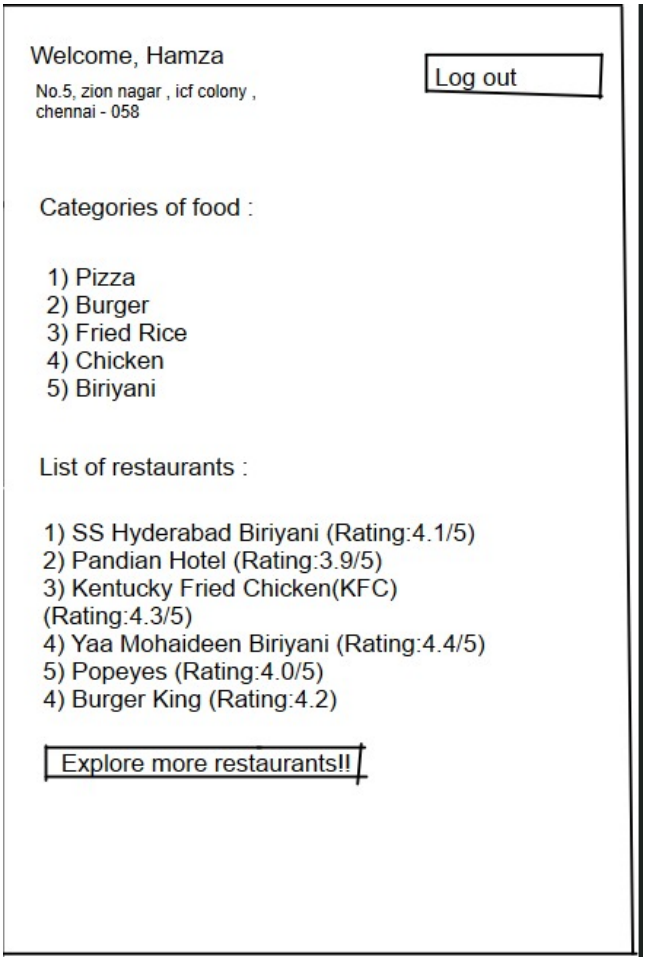
- OpenBoard software
- Drawing tools (pen, shapes, text tool)

PROCEDURE:

1. Identify the main screens required for the food delivery app such as Home, Menu, and Cart.
2. Understand the user journey from browsing food items to placing an order.
3. Open OpenBoard and create a new document.
4. Draw individual frames representing each screen of the application.
5. Sketch UI elements such as buttons, text fields, categories, and lists.
6. Arrange the screens sequentially to show navigation flow.
7. Use arrows or logical flow to represent movement between screens.

STORYBOARD REPRESENTATION

1. Home Screen



Description:

The home screen displays user details, address, and available food categories such as Pizza, Burger, Fried Rice, Chicken, and Biriyani.
It also shows a list of restaurants with ratings and an option to explore more restaurants.
A logout button is provided for exiting the application.

2. Menu Screen

SS Hyderabad Biriyani

Popular picks :

1) Mutton Biriyani (Frequently ordered)
2) Chicken Biriyani (Bestseller)
3) Grill Chicken (Half)
4) Chicken Tandoori (Half)

Starters :

1) Mutton Soup
2) Chicken Soup
3) Butter Naan
4) Tandoori Roti
5) Butter Chicken
6) Pepper Chicken (Grvay)
7) Chicken Tikka Masala

Fried Rice :

1) Mutton Fried Rice
2) Chicken Fried Rice
3) Egg Fried Rice
4) Chicken Schz Fried Rice
5) Egg Schz Fried Rice

Beverages :

1) Mojito

Description:
This screen shows the selected restaurant's menu.
It includes:

- Popular items (frequently ordered dishes)
- Starters
- Fried rice varieties
- Beverages

Users can view food options and decide what to order.

3. Cart Screen

Description:
The cart screen displays:

- Selected food items with quantity
- Total bill calculation
- GST and additional charges
- Discount applied
- Final payable amount

It also provides a **payment option (UPI)** to complete the order.

USER FLOW (EXPLANATION):

1. User opens the app and lands on the **Home Screen**
2. User selects a restaurant from the list
3. App navigates to the **Menu Screen**
4. User selects items and adds them to the cart
5. User proceeds to the **Cart Screen**
6. User reviews order and completes payment

RESULT:

The storyboard successfully represents the user flow of a food delivery application using OpenBoard sketches, showing the transition from browsing to order completion.
